PROFESSIONAL SUMMARY

Senior Laravel / Full Stack Developer with 7+ years of experience building scalable applications, REST APIs, and AI-powered systems. Specialized in backend architecture, performance optimization, and real-world AI integrations. Built portfolio AI chat assistants and production-grade business platforms across ERP, booking, CMS, and email domains.

PORTFOLIO NOTE

Portfolio: sasho-dev.com/portfolio. It includes an AI chat assistant that answers questions about career, projects, and skills using data published on the site.

FEATURED PROJECTS

AI Questionnaire System

https://sasho-dev.com/questionnaire_ai/login

- AI-generated tests using OpenAI
- Dynamic questions, scoring, and time limits
- REST API and CSV export

Booking AI System

<https://sasho-dev.com/bookingAI/login>

- Smart booking logic and scheduling workflows
- Multi-business scalable architecture
- Role-based access control

Email Client (IMAP System)

<https://sasho-dev.com/email-client/>

- Multi-account email system
- IMAP/SMTP integration
- Full backend logic and API support

AI SKILLS

- Hands-on OpenAI API integration in Laravel applications (questionnaires, tests, booking logic)
- Built AI-powered career assistant for personal portfolio content
- Prompt engineering, REST AI service consumption, and embedding AI in full-stack products

EXPERIENCE

Devrix - Full Stack Developer (2025 - Present)

- Built and maintained Laravel and WordPress solutions
- Delivered third-party API integrations
